Allowable Subject Matter

1. Claim 17 is allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method and device for parameter independent buffer underrun prevention in a data communication system. Claim 17 identifies the uniquely distinct feature "means for determining the length of a time gap between the completion of writing data into said buffer and completion of reading data from said buffer". The closest prior art, Kalkunte (U.S. 6,138,189) disclose a network interface having adaptive transmit start point for each packet to avoid transmit underflow, Sartain et al. (U.S. 6,678,243) disclose a data overflow compensating method in digital-to-analog converter system, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey C. Pwu whose telephone number is 571-272-6798. The examiner can normally be reached on 7:00-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wiley can be reached on 571-272-3923. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
